Enter your final Tag options from check boxes above. Example: 1391LSSMN

Final Part Number	1391				S		N	-	(Options #)
-------------------	------	--	--	--	---	--	---	---	-------------

### 125 kHz Tag Programming Information

Format Number	Field Name(s) e.g. Facility Code	Value	QTY	Encoded Start Number	Encoded Stop Number
				Printed Start Number	Printed Stop Number

<sup>1</sup> For new artwork files, contact Customer Service for custom artwork number, lead-times, minimum order quantities, and cost.

<sup>2</sup> The Printed tag number is placed on the back of the tag. In order to support laser marking technology HID will be transitioning from a white release paper to a black release paper. Please consult your sales Account Manager for more information.

<sup>3</sup> Please note that cards shipped within the Americas are always laser-engraved. Inkjetted option is not available for these cards.

The MicroProx Tag is not for use on cards that use full insertion or tractor feed type readers.

Do not adhere to metal surfaces. Metal shields the RF, making the tag inoperable. Due to variations in cards and reading devices, HID does not claim that the MicroProx Tag will work in every situation. Functional and non-functional MicroProx Tags are available for compatibility testing with existing credential and reader technologies. Compatibility should be confirmed prior to ordering.

#### MicroProx Placement
