Hewlett Packard Enterprise

LTO Ultrium Media

Hewlett Packard Enterprise Ultrium tape technology has been designed to deliver exceptional reliability and performance at the lowest cost per GB. The Ultrium format builds on the best of existing technologies; open standards increase innovation and widen customer choice in terms of performance, capacity and form factor. Backed by Hewlett Packard Enterprise’s exhaustive media qualification process, HPE Ultrium data cartridges support all HPE and non-HPE Ultrium tape devices.

Key features and benefits

• Up to 15 TB compressed capacity.
• Supports transfer speeds up to 300 MB/sec or 11 TB hour native with LTO-7.
• Both Advanced Metal Particle and Barium Ferrite options available for LTO-6.
• For use in all HPE and non-HPE LTO Ultrium products.
• Unique colored cartridge to assist with identification in mixed media environments.
• Very low media cost per TB – maximize storage density within the data center.
• LTO cartridge memory in media to improve access time and provide enhanced media monitoring.
• Durable cartridge designed to minimize wear and debris (important in automation).
• Tested to extremes to a level of specification unique to Hewlett Packard Enterprise. Many of the test procedures required for HPE brand qualification (eg. load/unload, shoeshine, drop testing and environmental stress testing) are not required for the LTO Ultrium logo.
• Hardware-based encryption for compliance with FIPS 140-2 level 1 security standards.
• Hewlett Packard Enterprise offers both Custom Labeled and Non-Custom Labeled data cartridges in both standard bar code and Radio Frequency Identification (RFID) versions.
  • Custom Labeled offerings allow automation customers the ability to customize their label to their specific needs. This includes the ability to define the bar code label type and to specify an exact label sequence.
  • Non-Custom Labelled media allows automation customers the ability to receive labeled media without having to wait for a custom labeled solution. Bar code sequences are predetermined by HPE and are guaranteed to be unique.
